Abstract: Systematic case paper management system for homeopathy doctors automates activities of each and every homeopathy doctor's in their hospital, in hospital and generates reports in few seconds. Doctors can easily add, edit, search, view and print case paper and also they can add follow up details of patient, doctors can able to see all the graph of patient like total number of case papers, last month case papers, current month cases papers, weekly cases papers and pie chart of case papers by age. All these can be very efficiently managed from our project.

Keywords: homeopathy doctors, case paper management, homeopathy case paper, software for homeopathy doctors

I. INTRODUCTION

We got this requirement from Dr. Avinash Todkar and our project is sponsored by Todkar clinic. They were supposed to maintain patient details on paper and it is difficult to maintain patient details. They suggested us to develop the software such that homeopathy doctors can able to add, edit, search, print and view patient details quickly.

II. BACKGROUND

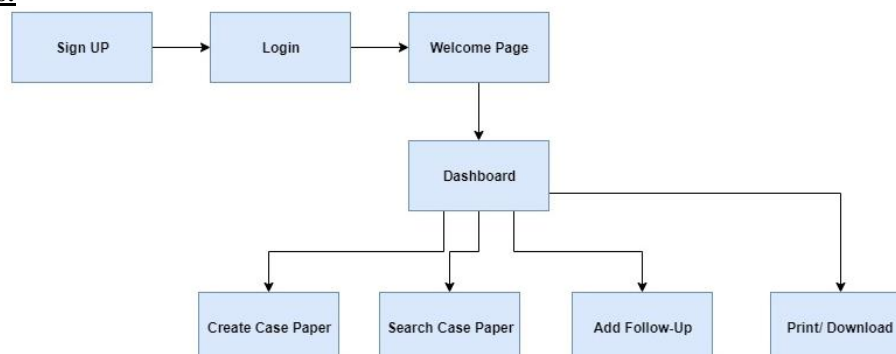

We meet the Dr. Avinash Todkar in his Clinic. He told us their problems while adding patient's details. They take more time to add and it is very difficult to maintain patients' details as well. They were doing paper work in clinic. Lots of paper work. Every time doctors need to write patient details on paper. It is also difficult to find patient details if he/she come after few days for follow-up. There are around 50 fields of human body he need to write on paper. We took requirement from him. He told us to create software such that it will take care of to add, edit, search, print and view patient details.

III.NEED OF PROJECT

- Doctors will be able to see more patients in less of time
- Doctor can add, edit and search patient's details easily.
- Doctor can easily view the patient's details and he can modify the patient details whenever required.
- Doctor can able to search patients details on view page based on mobile number or first and last name.
- Doctor can easily take printout of follow-up.

IV.DETAILED METHODOLOGY OF SOLVING THE IDENTIFIED PROBLEM

Project Modules:

○ **Signup:**

We are giving provision to create new user based on his user name and password. Once he successfully signup then he can able to login into our system.

○ **Login:**

User can login using his username and password. Once he logged in he can able to see welcome page/dashboard.

○ **Welcome Page:**

This is greeting page for user and he can see create case paper, search case paper and download button on dashboard. Widgets of weekly, monthly, last month, case paper by age pie chart widgets will be display.

○ **Add, Edit, View and Print Patient details:**

User can add, edit, search, view and print patient details.

V. OUTCOME/ RESULT

Dashboard:

Create Case Paper:

The form includes the following fields:

- * Case paper number:
- * First Name:
- * Last Name:
- * Gender:
- Occupation:
- * Age:
- Contact No:
- Address:

Health details

Followup Date	Complaint	Diagnosis	Medicine	Weight	Mind	Head	Hair	Sleep
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

At the bottom right, there is a **Save** button.

Add Follow-Up:

Add followup

Basic Parameters

* Followup Date: * Complaint:

* Diagnosis: * Medicine:

Other Parameters

Weight:	<input type="text"/>	Back:	<input type="text"/>
Mind:	<input type="text"/>	Urine:	<input type="text"/>
head:	<input type="text"/>	Stool:	<input type="text"/>
Hairs:	<input type="text"/>	Extremities:	<input type="text"/>
Sleep:	<input type="text"/>	Skin:	<input type="text"/>
Dreams:	<input type="text"/>	Thermal:	<input type="text"/>
Eyes:	<input type="text"/>	Throat:	<input type="text"/>
Ears:	<input type="text"/>	Chest:	<input type="text"/>
Nose:	<input type="text"/>	Stomach:	<input type="text"/>
Mouth:	<input type="text"/>	Blood Report:	<input type="text"/>

**VI. CONCLUSION**

Systematic case paper management system for homeopathy doctor's software plays important role for all the homeopathy doctors to maintain their patient details efficiently. This software we have developed in Java and Java Script framework. It will act as web application. A doctor requires only laptop with minimum configuration and they can open our web application in their browsers to access our application.
