Abstract– In this project we are creating an online crime reporting system software which can accessed by people's the department. In India the public was afraid of the false grievances regarding the department of government. With Online Reporting System public can report a crime without any fear and they can easily contact the department where they can solve the problem in effective manner and department can easily catches the criminals by checking the previous record from inferior data. This computer software is safe and protective for the user as well as for department and admin because there will be no leakage of any generous of information Here we want to create an online crime reporting system software which is well accessible to the general public, the department of local government and there-fore the body department. The traditional public in Asian country is afraid to lodge a grievance as a result of their full of a false worry regarding the department of local government. A web grievance registering system can allay the fears of the general public and can conjointly facilitate within the public serving to the department of local government in catching criminals. This system has been taken as a protective and safetybased application for both public and government interest.

Keywords: Complaints, Crimes, Investigations etc.

I. INTRODUCTION

Crime is also a section of outlaw activities in humanperiod expectation. It's pretty noticeable that the speed of crimes is growing day by day altogether, although we have a tendency to incline to try toLiving that there's masses which can be done by the governments and thus the folks to chop back the crimes in societies. There are various existing crime reportage systems that appearances several issues, as there's nosuggests that to report crime instantly other than phone calls, messaging or face-to-face compliant filling. Hence, here we have a tendency to tend to propose an online crime coverage system that allow the user to file misconduct reports and keep a track of it. To file any of the upper than 3 complaints, the user need to register in to the system and provide his right credentials to file them. The crime coverage system project jointlypermits totally different users international organisation agency doesn't got to register but can check the crimes happening at his/her or the oppositerea, should merely supply the pin code and reciprocally the system displays the list of crimes in any filed. The offline i.e. the unregistered user will even benefit of checking the missing person details, but he/she is shunned getting complaints done by the users. The front of the crime coverage system is finished victimization android Studio and SQL may be a backend to store books lists and inventory info. This system helps the users tofiled to the law and take a bonus of coverage of any grievance from anywhere through online mode. Crime may be a part of outlaw activities in humanlife. it's quite obvious that the speed of crimes is increasing day by dayaltogether societies across the globe, however we tend to do be- live that there's loads which may be done by each the governments and therefore the people to cut back the crimes in com- munities. There square measure several current crime management systems that faces many difficulties, as there's no suggests that to report crime instantly aside from phone calls, electronic messaging or face-to- face compliant filling. Hence, here we tend to propose a web crime reportage system that permits the user to file misconduct reports and keep a track of it. To file any of the higher than three complaints, the user ought to register in to the system and supply his right credentials to file them. The crime reportage system project conjointly permits different users UnitedNations agency doesn't need to register however will check the crimes happening at his/her or the other space, must simply offer the pin code and reciprocally the system displays the list of crimes if any filed. The offline i.e. the unregistered user can even cash in of checking the missing person details, however he/she is shunned obtaining complaints done by the users. The forepart of the crime reportage system is finished victimization humanoid Studio and SQL is a backend to store books lists and inventory information. The system, has each the user likewise the Admin half, the role of admin is to merely check all the three modules or classes and update their standing likewise. this technique helps the users in following any report filed to the law and take a bonus of reportage any grievance from anyplace conveyance the complete system on-line.

II. METHODOLOGY

Outcome of all the labor in plight jail management system is here. It's a software package that helps the user to work with the prisons and crimes merely. This software package goes to be a really helpful and useful for our society. It saves time as an individual will lodge AN FIR while not attending to the station or govt. organization. Each time any incident or accident or any criminal activity apparent itself and it's updated in it, it'll be hold on for future references and security purpose. This on-line crime coverage system might be a resolution to all or any the problems that square measure related to wrongdoer details, violation of the law or something that is unconstitutional.

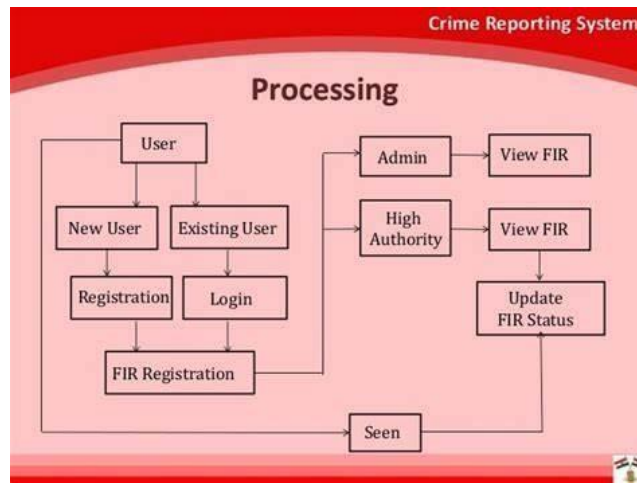

Fig. Processing of online crime reporting system

In this system there are two different interfaces, one is for the public which is the public portal in which registration can be done by the public sector and then comes the other portal which is the admin portal which is controlled by government organization.

III. SCOPE

This website is an easy to view type of a site. It is simply accessible to anyone who is sixteen years and above and this is an example of a simple engineering which is easy and can be used freely without complexness. This website will provide user with a profile under which he/she can add anything and no misuse will be conducted as it has some eligible criteria and which has to be taken care of, so the chances are less.

IV. CONCLUSION

The Online Crime Reporting System may be an internet application system that is just too a lot of useful for all the folk, government organization and completely different societies. This can be supported an awfully straightforward and non-complex approach.

This has been created as a security live for all section of individuals and societies. something that is against the law or associate degree one United Nations agency is violating the law can currently have some worry as currently filing an FIR is way easier than it had been before. The Online Crime Reporting System may be a success with satisfaction from each the individuals and government organizations. This has been tested and may be a success. So, this way builds more economical.
