Graphics presented by Indian comic apps are poor, they are not good at catching the attention of readers; the important thing in comics/novels is visual presentation, to the readers if they find it interesting and eye-catching, they will try to find more and more about the comic/ novel. The storyline and synopsis of the comic/novel itself catch attention if readers find it interesting. Prologues (introductory chapters) of a comic/novel give readers hints about if the story is interesting or not. Don't stretch the stories too long or such stories that have long chapters. Keep it ongoing don't be on hiatus for long for chapters/episodes keep them simple but amazing. Communication between reader and writer is also an important aspect.
